Skills

- React / Next.js
- React Native / Expo
- Vue.js
- TypeScript
- Redux Toolkit
- RTK Query
- Zustand / Pinia
- Tailwind CSS
- shadcn/ui
- Firebase
- Socket.IO
- Kotlin

Professional Experience

React Native Developer   Tabriz, Iran

Dadeh Pardazane Tavanayi Iranian   Apr 2025 – Present

React Native developer responsible for improving performance, stability and
feature set across a suite of customer- and POS-facing Android/iOS apps.

- Refactored legacy React Native codebases, stabilizing poorly structured
  modules to make them safe for ongoing production development.

- Introduced a consistent data-fetching and state management approach using
  RTK Query, reducing duplicated logic and making feature development
  predictable.

- Delivered new user-facing features on top of existing systems (including
  booking and reservation workflows).

- Improved runtime performance, UI responsiveness, and receipt printing
  performance on POS devices by resolving production bottlenecks.

- Collaborated with QA and backend teams to stabilize releases, added
  defensive error handling and improved observability for production issues.

React Native Developer (Remote)   Tehran, Iran

Kenzx (https://kenzx.io)   Jan 2025 – Jul 2025

Developed a cross-platform crypto trading application with React Native Expo for
Android and iOS, enabling users to buy, trade, and manage digital assets.

- Engineered core functionalities, including real-time market data integration
  and secure transaction flows.

- Collaborated remotely with cross-functional teams to seamlessly integrate
  secure APIs and ensure efficient data exchange.

React Native Developer   Tabriz, Iran

Aria Khodro Simaye Sabz   June 2022 – Sept. 2024

Led the development of 5 mobile applications across two major projects, Aria and
Parkoja, delivering complete end-to-end solutions for ticketing, cargo delivery, and
smart parking systems.

Aria Project:

- Developed 3 apps focused on bus ticketing and cargo delivery services.
  - **User App** (Bare React Native – Android/iOS)**:** Enabled users to purchase and store bus tickets as QR codes, share them, and schedule cargo deliveries with map-based location selection and live tracking.
  - **Station Attendant App** (Expo – Android)**:** Created a QR code scanning system using the device's camera and infrared scanner for ticket validation.
  - **Delivery Attendant App** (Bare React Native – Android/iOS)**:** Facilitated request management for delivery drivers, including real-time route tracking and SMS notifications.

Parkoja Project:

- Developed 2 apps for a smart parking system that managed vehicle parking and fee payments.
  - **User App** (Expo – Android/iOS)**:** Allowed users to manage their plate numbers, view available parking spots, and pay parking fees via in-app credit or with payment cards.
  - **Parking Attendant App** (Bare React Native – Android)**:** Designed an app for attendants to issue parking tickets using POS devices with AI-based plate recognition, supporting real-time POS payments, credit management, and thermal receipt printing for customers.

Education

University of Tabriz	Tabriz, Iran
Bachelor of Arts in English Language and Literature	August 2022
	GPA: 18.09

Personal Projects

AIO Planner RN (React Native) **-** (https://github.com/n-ii-ma/AIO-Planner-React-Native)**:** Multipurpose app with task management, income/expense calculator and GPS-based weather lookup (OpenWeather).

Emrooz Chandome? (Expo) **-** (https://github.com/n-ii-ma/Chandome): Calendar app showing Gregorian, Jalali and Hijri dates, Jalali holiday detection, plus a home-screen widget.

IP Address Tracker (Next.js) **-** (https://ip-address-tracker-blond-one.vercel.app): Real-time IP/domain geolocation and ISP lookup, built with Next.js and Tailwind CSS.

Repotify (React) **-** (https://repotify.netlify.app)**:** SPA using the Spotify API to search artists and play/share their top tracks via Spotify Embed.

Expense Tracker (Vue.js) **-** (https://expense-tracker-iota-lemon.vercel.app)**:** SPA for recording transactions with real-time balance, income, and expense calculations; uses Pinia and Tailwind CSS.

Note Land (PERN Stack) **-** (https://github.com/n-ii-ma/Note-Land-E-Commerce)**:** Full-stack e-commerce app with user accounts, product browsing, and checkout flows, built with the PERN stack and Material UI 5.
